

Warehouse Navigation

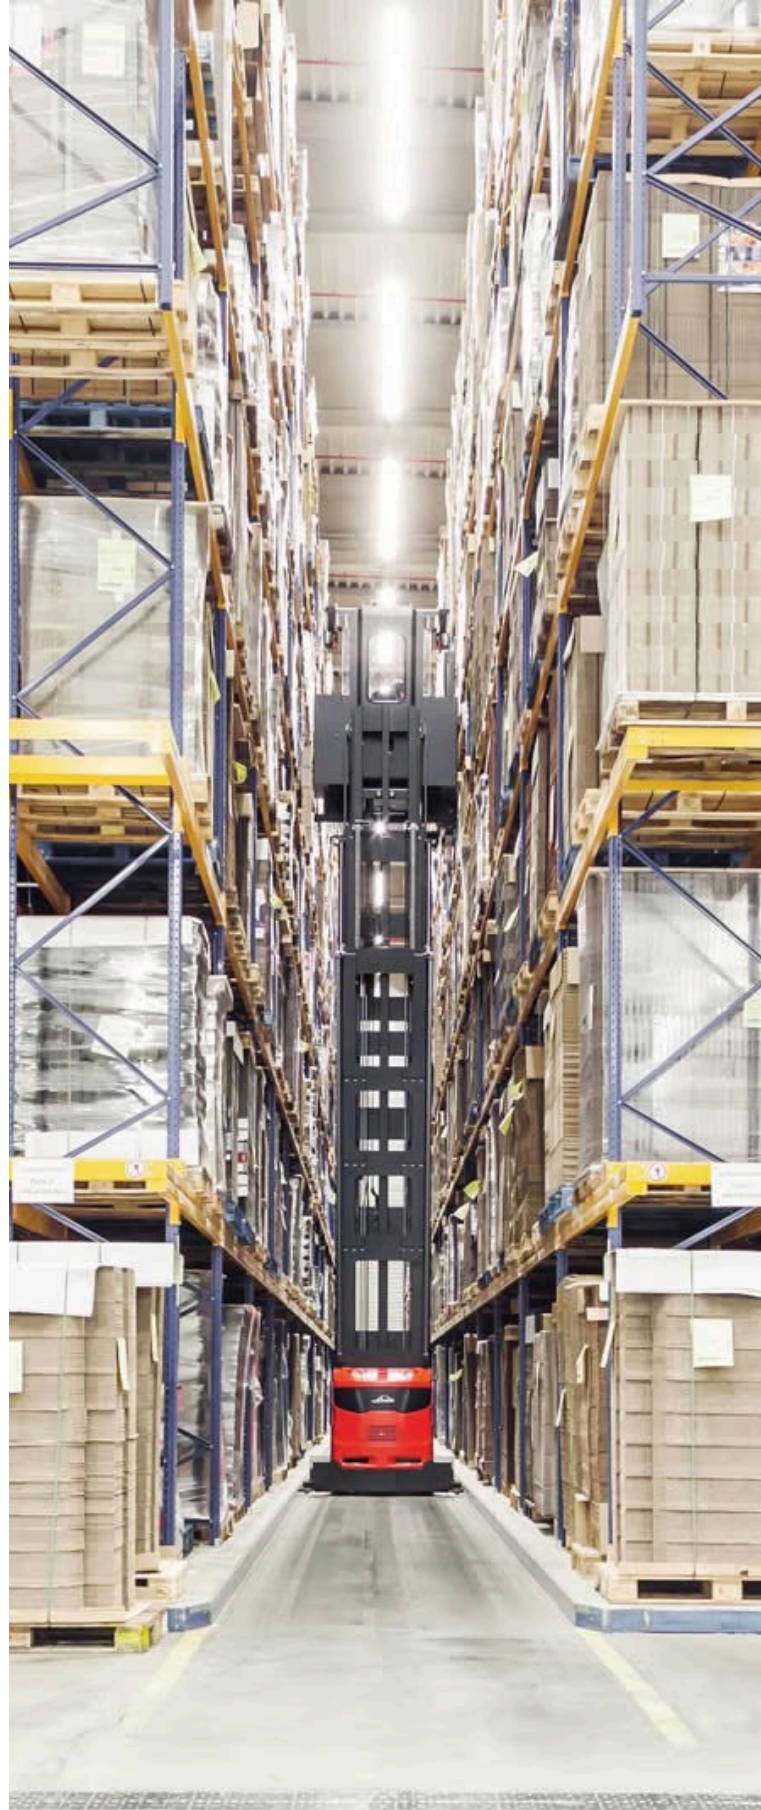

Narrow aisle storage offers high-density solutions but requires precision and efficiency. With **Linde Warehouse Navigation**, drivers can travel accurately through high racks, reducing errors and improving productivity.

HOW IT WORKS

- 1) Seamless Integration** – Connects to your warehouse management system (WMS) via Wi-Fi.
- 2) Guided Navigation** – Displays the fastest route and directs the truck to the correct location.
- 3) Real-Time Order Processing** – Automatically confirms task completion and receives new orders.
- 4) RFID & Barcode Tracking** – Ensures precise truck positioning and minimizes driver errors.
- 5) Semi-Automation for Efficiency** – Optimizes driving & lifting movements, reducing strain on drivers.

KEY BENEFITS

- **Increased Productivity** – Guides operators through the most efficient routes, reducing travel time.
- **Error Reduction** – Minimizes misplaced pallets by providing precise location guidance.
- **Seamless Integration** – Communicates with warehouse management systems via Wi-Fi.
- **Enhanced Operator Support** – Reduces strain on drivers through semi-automated positioning.
- **Adaptable System** – Customizable for different warehouse layouts and heights.

Linde Warehouse Navigation optimizes workflows, reduces errors, and increases efficiency, making it an essential tool for high-density storage operations.

At **Total Warehouse**, we've helped countless businesses across the United States achieve lower maintenance, reduced costs, increased worker satisfaction, and increased economic sustainability by making the switch. Our team of highly knowledgeable experts can help you make the right decision for your business. Give us a call at 833-868-2500 or [contact us online](#).
